EXECUTIVE SUMMARY

Fresher AI Engineer with hands-on experience building production-grade RAG pipelines, on-device LLMs, and computer vision systems. Proven ability to ship end-to-end AI applications using LangChain, LlamaIndex, FastAPI, and Docker. Interned at Infosys Springboard and Lavendel Consulting. Led a 100+ member technical association as President. Passionate about building real-world GenAI products at scale.

EDUCATION

- **B.Tech — Artificial Intelligence and Data Science**
Kangeyam Institute of Technology 2022 – 2026
CGPA: 8.43 | Relevant Coursework: Data Science, Machine Learning, Deep Learning, Python Programming, Data Visualization
- **HSC — Navarasam Matric Hr Sec School** Percentage: 77.8%
- **SSLC — Navarasam Matric Hr Sec School** Percentage: 98%

SKILLS

- **Languages:** Python, SQL
- **GenAI & LLM Stack:** LangChain, LangGraph, LlamaIndex, RAG Pipelines, Hybrid Retrieval, Prompt Engineering, FAISS, ChromaDB, Groq API, OpenAI API, On-device LLMs (GGUF)
- **AI/ML Stack:** TensorFlow, Keras, Scikit-learn, Computer Vision, NLP, Ensemble Models, Model Fine-tuning
- **Backend & MLOps:** FastAPI, Flask, REST APIs, Docker, docker-compose, MLflow, PostgreSQL

PROJECTS

Hybrid RAG AI Assistant *Python, FastAPI, Groq API, FAISS, MLflow, Docker*

- Built a production-grade RAG system using FastAPI + FAISS + Groq (Llama 3.3 70B) for intelligent document question answering, achieving sub-800ms average response latency.
- Implemented hybrid retrieval combining dense vector search (FAISS) with live web search (DuckDuckGo + Wikipedia) - improving answer accuracy for out-of-context queries by eliminating hallucinations on live data.
- Designed REST APIs with dynamic query routing and integrated MLflow to track latency, token usage, and response quality metrics across 1,000+ document chunks
- Containerized the full stack with Docker and docker-compose; added session-based memory management and automatic document re-indexing on startup.

Aura AID — Offline AI Safety App *Kotlin, Jetpack Compose, RunAnywhere SDK, On-device LLM (GGUF), Android*

- Engineered a native Android safety application with an on-device LLM (GGUF via RunAnywhere SDK) — designed for zero-connectivity emergency scenarios with no cloud dependency and zero data collection.
- Built Shake-to-SOS and crash detection features for automated emergency response, paired with an offline AI First-Aid guide that runs entirely on-device.
- Implemented real-time Live Location Sharing and a Safety Escort system for active threat monitoring — privacy-first design with no API keys or external calls.

Multi-User Real-Time Eye Gaze Tracking

Python, OpenCV, MediaPipe, Tkinter

- Engineered a real-time gaze tracking system achieving stable 28+ FPS across 5 simultaneous users, with unique color-coded labels per user — deployed as a client deliverable at Lavendel Consulting.
- Improved gaze accuracy by fusing iris tracking, head-pose estimation, and regression models, reducing tracking drift compared to single-model baselines.
- Designed a modular pipeline supporting concurrent face recognition and calibration per user session.

AI-Powered LinkedIn Automation Bot

Python, Google Gemini 2.5 Flash, LinkedIn API, OAuth 2.0

- Built an LLM-powered content automation pipeline that generated and published professional LinkedIn posts — reducing manual social media effort by 80
- Implemented secure OAuth 2.0 authentication for programmatic posting via the LinkedIn API, with structured prompt templates for consistent tone and format.

INTERNSHIP EXPERIENCE

AI Intern | Infosys Springboard

Dec 2025 – Jan 2026

- Built EcoPackAI — a sustainable packaging recommendation engine using Flask, PostgreSQL, and XGBoost to generate supply-chain sustainability insights for enterprise clients.
- Developed a full-stack BI dashboard to visualize sustainability metrics, enabling data-driven packaging decisions across product categories.

AI Intern | Lavendel Consulting

May 2025 – Aug 2025

- Delivered a production real-time gaze tracking system for a client use case — collaborated with cross-functional team to meet performance requirements for 5 concurrent users.
- Handled full pipeline: face recognition, per-user calibration, gaze regression, and live multi-user rendering at stable high FPS.

In-Plant Intern | Global Knowledge

- Applied KNIME for data preprocessing, feature extraction, and model deployment workflow automation.

LEADERSHIP & EXTRACURRICULARS

- **President — Association of AI & Data Science** | Kangeyam Institute of Technology Aug 2025 – May 2026
Led a 100+ member student association — organized technical events, hackathons, and industry speaker sessions; drove collaborations with companies for student exposure to real-world AI roles.
- **Secretary / Mentor — Rotaract Club** | Kangeyam Institute of Technology Jul 2024 – May 2026
Managed 25+ events as Secretary; transitioned to Mentor role to guide juniors in technical projects and leadership development.

CERTIFICATIONS

Joy of Computing Using Python — NPTEL

Foundation of Cloud, IoT & Edge ML — NPTEL

Artificial Intelligence Primer — Infosys Springboard

Prompt Engineering — Infosys Springboard

AWARDS & RECOGNITION

- **Best Secretary Award** — Leadership recognition, Rotaract Club, RI District 3203.
- **Outstanding Academic Performance** — Top performer recognition, RI District 3203.
- **1st Prize** — Coding & Debugging Competition, Vellalar College of Engineering and Technology.
